### 1- Environmental Policy Statement

1. To commit to meeting the needs and expectations of interested parties, complying with all applicable environmental laws, international legislation, and ISO 14001:2015 standards, and integrating environmental protection into commercial and management practices.
2. To Ensure Compliance with the National Port Environmental Guidelines, the environmental Guidelines From IMO, the environmental guidelines from the world Trade Organization.
3. To provide continuous environmental education, training, and awareness programs to employees, contractors, and stakeholders to ensure responsible, innovative, and sustainable practices in all activities
4. To encourage appropriate relation with the public and private sector of the port community, include consultations with local Communities, authorities, and other Relevant Stakeholders in terms of environmental issues, to promote community participation, co-create a friendly port city-environment.
5. To publish every 2 years the port's Environmental Performance on the Port's website.
6. To continual analyze the results and establishment of actions aimed at the continues improvement of the organization and other relevant Stakeholders and to contribute to it.
7. To support research, innovation, and technology adoption for cleaner, safer, and more sustainable port operations, including renewable energy integration, digital monitoring, and automation.
8. To commit to climate action by reducing greenhouse gas emissions, enhancing energy efficiency, promoting renewable energy use, and contributing to national and international climate goals

### 2- Environmental Policy Goals

1. Conduct regular reviews and updates of the Environmental Policy and Environmental Management System (EMS), aligned with ISO 14001:2015 requirements and emerging global best practices.
2. Maintain and test emergency and response plans for all possible incidents in the port area to minimize negative impacts on the marine, coastal, and urban environment.
3. Ensure compliance with all local, national, and international environmental obligations, supported by internal audits and external verification.
4. Empower employees through training, resources, and innovation tools to adopt a proactive role in environmental protection and sustainability.
5. Improve air quality through advanced monitoring, emission reduction programs, and cleaner energy alternatives.
6. Reduce waste by implementing a circular economy approach, enhancing waste segregation, recycling, and promoting zero-waste initiatives
7. Develop and implement sustainable port development strategies that integrate environmental protection with smart city and community development initiatives.
8. Strengthen relationships with local communities through open communication, partnerships, and corporate social responsibility initiatives.
9. Achieve measurable climate action targets, including a pathway towards carbon neutrality by 2050.
10. Increase renewable energy use to ensure access to affordable, reliable, sustainable, and modern energy by 203
